

StopLoss™ Jones Tube

Simple. Efficient. Stable.

FCI EXCLUSIVE

Indicated for Conjunctivodacryocystorhinostomy (CDCR)
and repair of the lacrimal system for intubation and
bypass to canalicular pathologies

www.FCI-Ophthalmics.com

The StopLoss™ Jones Tube system puts an end to the high loss rate of ordinary Jones Tubes yet is safe, effective and easy to use.*

The unique patented tube design leads to exceptional levels of tube stability. A new introducer system ensures simple and accurate tube placement every time.

MAIN CHARACTERISTICS

EXCEPTIONAL STABILITY

The flange of the tube is made of flexible & yet resistant silicone to prevent extrusion caused by nose-blowing, sneezing or eye-rubbing.

EASY TO USE

The introducer set allows the surgeon to choose the most appropriate tube. The patented design ensures a simple placement during insertion and simple removal during extraction, thanks to the flexible silicone flange.

EXCELLENT TEAR DRAINAGE

Tubes are made of Pyrex™ glass that enables excellent tear drainage, longevity, and have a long history of perfect biocompatibility.

- Sterile, Box of 1

INTRODUCER SET

- The introducer set enables the surgeon to choose the most appropriate diameter and length of the StopLoss™ Jones Tube prior to tube insertion
- It also enables a simple placement of the StopLoss™ Jones Tube
- The double-ended dilator is used to enlarge the passage
- The patented sizing devices enable the selection of the required tube size
- Covers all standard Jones Tube sizes
- Includes: 1 dilator, 4 sizers, 1 guide wire, 1 detachable end cap
- Sterile, Box of 1

STOPLOSS™ JONES TUBE
Introducer Set: S1.7500**

REMOVAL TOOL

- The removal tool ensures a simple and non-traumatic removal/extraction of StopLoss™ Jones Tube
- The loop of the metal rod is placed around the tube to grip it and safely remove it
- Includes: 1 metal rod and 1 guide-wire
- Sterile, Box of 1
